DATE MAILED: 06/24/2003

Please find below and/or attached an Office communication concerning this application or proceeding.

<b>Office Action Summary</b>	<b>Application No.</b>	<b>Applicant(s)</b>	
	09/774,302	PRAHLAD ET AL.	
	<b>Examiner</b>	<b>Art Unit</b>	
	Mehdi Namazi	2188	

**-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 30 January 2001.
- 2a) ☐ This action is **FINAL**.                      2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

**Disposition of Claims**

- 4) ☒ Claim(s) 1-11 is/are pending in the application.
- 4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.
- 5) ☐ Claim(s) \_\_\_\_\_ is/are allowed.
- 6) ☒ Claim(s) 1-11 is/are rejected.
- 7) ☐ Claim(s) \_\_\_\_\_ is/are objected to.
- 8) ☐ Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

**Application Papers**

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 30 January 2001 is/are: a) ☒ accepted or b) ☐ objected to by the Examiner.  
     Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
- 11) ☐ The proposed drawing correction filed on \_\_\_\_\_ is: a) ☐ approved b) ☐ disapproved by the Examiner.  
     If approved, corrected drawings are required in reply to this Office action.
- 12) ☐ The oath or declaration is objected to by the Examiner.

**Priority under 35 U.S.C. §§ 119 and 120**

- 13) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).  
     a) ☐ All    b) ☐ Some \*    c) ☐ None of:  
         1. ☐ Certified copies of the priority documents have been received.  
         2. ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.  
         3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).  
     \* See the attached detailed Office action for a list of the certified copies not received.
- 14) ☒ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. § 119(e) (to a provisional application).  
     a) ☐ The translation of the foreign language provisional application has been received.
- 15) ☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. §§ 120 and/or 121.

Art Unit: 2188

### DETAILED ACTION

1. This office action is in response to the application filed January 30, 2001.

#### *Claim Rejections - 35 USC § 102*

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in-

(1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or

(2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).

3. Claims 1-11 are rejected under 35 U.S.C. 102(e) as being anticipated by Aoyama et al. (Aoyama) (U.S. Patent No. 6,301,592).

As per claim 1, Aoyama teaches a document management system ("a modular data and storage management system"; col. 1, lines 11-12), comprising: each version information includes a version name, a creator or writer of the version, a version data and time ("a time variance interface that provides for storage

Art Unit: 2188

into a storage media of data that is received over time, the time variance interface of the modular data and storage management system providing for retrieval, from the storage media, of an indication of the data corresponding to a user specified date; col. 2, lines 44-48), and

in this connection, "version management" indicates management of information items such as a version number of a document or a program source and a creation date of each version such that when a user edits and updates documents and program sources, it is possible to store and to retrieve any version of documents and program sources("the retrieved indication of the data providing a user with an option to access specific. information relative to the data, such as content of files that are included in the data"; col. 1, lines 38-44).

As per claim 2, Aoyama teaches to manage a large volume of documents of a firm in a concentrated manner for efficient use thereof, there has been an increasing need of a document to be retrieved and read therefrom("the retrieved data comprises exchange data"; col. 1, lines 20-25).

As per claim 3, Aoyama teaches the user can easily recognize a relationship between a particular version of CPP file and a header file of a particular version. Therefore, the user can

Art Unit: 2188

easily select and compile the program at an arbitrary point of time in the past. Moreover, the process of program development can be easily known("a logical view of the retrieved data is provided such that only a portion of the data is retrieved until specifically requested by a user"; col. 10, lines 58-63).

As per claim 4, Aoyama teaches a display image in which version information is combined with configuration information("the logical view creates a state of the modular data and storage management system that corresponds to an earlier state of the system"; abstract).

As per claim 5, Aoyama teaches the storage media is divided into more than one subset of storage media to provide a separate location for the data during the time that it is stored(figs. 6 and 8).

As per claim 6, Aoyama teaches wherein the data is migrated from one subset of storage media to another according to conditions such as length of time the data has been stored, type of data that has been stored, user that has stored the data, combinations of the specified conditions and similar conditions (fig. 6 clearly shows each set of data is migrated to other subset based on the creator, data, and time).

Art Unit: 2188

As per claim 7, Aoyama teaches when the user desires to know information of the editing operation conducted in the past for documents and program source of a project and information of relationship between versions of constituent elements ("a retrieval manager module having a master storage and backup map that is used to direct access to the data of the storage media such that data is retrieved only when specifically requested by the user"; col. 2, lines 13-22, fig. 1 shows the primary storage and secondary storage).

As per claims 8, and 10 Aoyama teaches a document management system "version management" indicates management of information items such as a version number of a document or a program source and a creation date of each version such that when a user edits and updates documents and program sources, it is possible to store and to retrieve any version of documents and program sources ("a method for a storage management system to display an index of stored data of a computer system and that allows a user access to a state of the computer system on a user specified date"; col. 1, lines 38-44), the method comprising: receiving data in the computer system;

Art Unit: 2188

storing the data into a storage media via an organizational scheme that provides a separate storage location for various versions, if any, of the data(figs. 6 and 8); indexing the stored data according to the date that modifications were made to the data and according to the storage location of the data(fig. 6 shows indexing data in different chapters); specifying a date on which to view the state of the computer system(fig. 6 also shows the date and time which data has been viewed); and "version management" indicates management of information items such as a version number of a document or a program source and a creation date of each version such that when a user edits and updates documents and program sources, it is possible to store and to retrieve any version of documents and program sources("retrieving the stored data that correspond to the state of the computer system on the specified date, the retrieved data including an option to retrieve additional data, if any, with respect to the retrieved data"; col. 1, lines 38-44).

As per claims 9, and 11, Aoyama teaches selecting the option to retrieve the additional data to thereby retrieve the additional data from the separate storage location of the storage

Art Unit: 2188

media((fig. 6 clearly shows each set of data is migrated to other subset based on the creator, data, and time)).

**Conclusion**

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mehdi Namazi whose telephone number is (703) 306-2758. The examiner can normally be reached on Monday-Friday from 8:00 AM to 4:30 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mano Pedmanabhan, can be reached on (703) 306-2903.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Group receptionist whose telephone number is (703) 305-9600.

**Any response to this action should be mailed to:**

Commissioner of Patents and Trademarks

Washington, D.C. 20231

**or faxed to:**

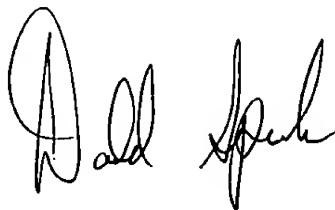

(703) 308-9051-2, (for formal communications intended for entry)

**Or:**

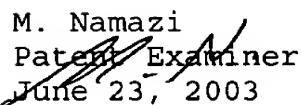

Art Unit: 2188

(703) 305-6606 (for informal or draft communications, please  
label PROPOSED or DRAFT )

Hand-delivered responses should be brought to Crystal Park 2,  
2121 Crystal Drive,  
Arlington, VA., Sixth Floor (Receptionist).

A handwritten signature in black ink, appearing to read "Donald A. Sparks". The signature is fluid and cursive, with the first name "Donald" being more prominent than the last name "Sparks".

Donald A. Sparks  
Supervisory Patent Examiner  
TC 2100

M. Namazi  
A handwritten signature in black ink, appearing to read "M. Namazi". The signature is written over the printed name and date.
